

## H2Pro<sup>®</sup> TriSmart

TriSmart by H2Pro is a new premium wetting agent. Designed for quality turf areas, its unique triple-active formulation presents great control over your moisture management. Containing three water management technologies, it provides great water penetration, even water spread through the rootzone and improves the water holding capacity of sandy rootzones. For best results apply as part of a wetting agent programme through the season, making applications monthly.

### Advantages

---

- Offers preventative and curative action against Dry Patch.
- Evenly distributes moisture through the upper soil profile.
- Significantly reduces irrigation requirements.

#### Use

Fine Turf

#### Product Category

Penetrant, Spreading, Holding

#### Application Rate (full programme)

10 L/ha monthly

#### Application Rate (late-start programme)

25 L/ha then 10 L/ha monthly

#### Water Volume

600 - 900 L/ha

#### Type

Liquid

#### Pack Size

4 x 5 L

#### Pack Coverage

1 - 2 ha

#### Specific Gravity

1.017

#### pH

7.0

---

## Description

---

TriSmart is designed for quality turf areas, its unique triple-active formulation provides great control over your moisture management.

Containing three water management technologies, it provides great water penetration, even water spread through the rootzone and improves the water holding capacity of sandy rootzones.

Very effective against LDS (Localised Dry Patch) development, the block polymer surfactant has also been selected for increased longevity in the rootzone.

## H2Pro Range

---

**The all new Specialist H2Pro wetting agents. Designed to help you get a grip on your moisture management.**

Utilising advanced polymer and surfactant technology, the new range of three specialist wetting agents; H2Pro TriSmart, H2Pro FlowSmart and H2Pro AquaSmart have been carefully formulated and tested to help you achieve better control of your moisture management.

Supported by research, backed by end-user testimonial the new range have been designed to achieve specific goals each with a different mode of action.

### **Advanced new technologies**

Each of these wetting agents has been formulated from a different blend of Block Co-polymers and co-formulants, incorporating specialist chemistries to achieve a specific result. The full range allows you to focus your moisture management to your particular needs.

Suggested period of use
